

## Windows - Determine the Windows Operating System Version

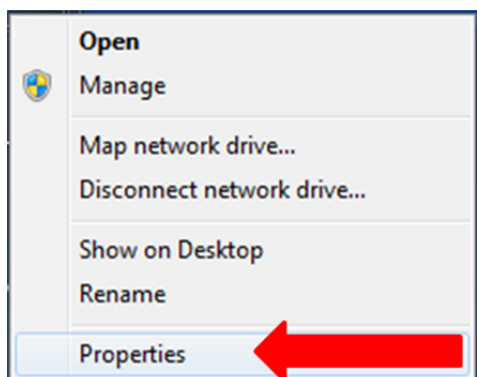

1. Click the **Windows** button (normally in the lower left and corner)

2. On the menu displayed, right click on **Computer** and select **Properties**

3. Select **Properties**

4. The section **View basic information about your computer** displays version information about your computer. **Windows edition** displays the version information, and **System type**: displays whether the operating system is 32-bit or 64-bit.

The screenshot shows the 'View basic information about your computer' window. It is divided into two sections: 'Windows edition' and 'System'. In the 'Windows edition' section, 'Windows 7 Enterprise' is circled in red. Below it, the copyright information and 'Service Pack 1' are listed. In the 'System' section, '64-bit Operating System' is circled in red. Other system details include a Windows Experience Index of 4.9, an Intel(R) Core(TM) i3 CPU 530 @ 2.93GHz, and 8.00 GB of installed memory (7.68 GB usable). The 'Pen and Touch' section indicates that no pen or touch input is available for the display.
