Course List on My Blackboard is not showing all my courses

Blackboard has restricted the course list to the top 99 courses (in Alphabetic order by Title) regardless of whether the course is checked in the settings or not. Therefore if the course you are looking for is the 100th course in the Alphabetic order by title, it will NEVER show in the Course list on the My Blackboard page.

The easiest way to find the course you are looking for is to use the built in search feature:

At the bottom of the course list, click on the MORE COURSES link

Change (1) CONTAINS to NOT BLANK
And change (2) ROLE EQUALS to INSTRUCTOR
Click (3) Go

The resulting list will have all the courses where you are enrolled as Instructor

Click on the desired course id to access the course.
