Getting Started in Blackboard Learn – What’s New?

When students first log into Blackboard, they are prompted with an overlay screen guiding them to the New Global navigation menu.

The global navigation menu contains information for all their Blackboard courses, starting with Posts, Announcements, and My Grades.
Examples of features/tools:

Posts:

Students can view posts from all their courses at a glance and reply to any.

Announcements:

Students can view system-wide or course specific announcements all at once.

My Grades:

Students can check to see what grades have been posted and which are still pending for all their courses.
