Determining Computer Name and/or IP address - Windows XP

Computer Name

Left click on the Start button on the bottom left of the screen and right click on My Computer, or the desktop may have an icon that says My Computer, right click on it.

After Accessing My Computer click on Properties.
A window that is titled **System Properties** will open. Click on the one titled **Computer Name**.

The computer name will be found next to the **Full Computer Name** field.

**Determining IP Address - Windows XP**

From the **Start** menu, right-click **My Network Places**, and then click **Properties**.

To view the IP address of a wired connection, double-click **Local Area Connection**.

Click the **Support** tab, and then click **Details**... The window that appears will display the IP address.
